PROCEEDINGS

Motion for Preliminary Approval -- Held (by remote access)

NOTES AND ORDERS

The preliminary approval motion, Dkt. No. 117, is denied without prejudice pending the submission of additional documents and information. By May 17, 2021, the parties will file new, simplified class notices and claims forms, a joint statement, and an updated proposed preliminary approval order. The joint statement should explain in more detail how members of the Credit Reporting Subclass will be identified and whether it is possible to identify them without using a claim form. It should also address the Court's concern that Credit Reporting Subclass members may be unlikely to file claim forms.
